

McPHILLIPS (WELLINGTON)
LIMITED
CIVIL ENGINEERING, BUILDING & DEVELOPMENT

Dear Occupant

As you are aware works are ongoing on Station Quarter gyratory system consisting of public realm pavement works, cycle lanes and traffic signal modifications to assist movement of traffic and pedestrians through this location.

We have some night time work commencing imminently which involves planning out of the existing carriageway, resurfacing and new line marking.

In order to maintain uninterrupted traffic flows through the town these works will be carried out at night.

Work will commence on Monday 7th July and the first 2 nights will consist of planning out a section of New Park Road and along Castle Foregate down to Howard Street / Cross Street junction and then surfacing up to Friday night 11th July with line marking following on.

Works will then continue on nights from Monday 21st July through until provisionally Friday 15th August and will include plane out , surfacing and line marking along Castle Foregate up to and including its junction with Smithfield Road, Smithfield Road down to and including its junction with the bus station, Chester Street down to and including its junction with Ellesmere Road and Cross Street and Cross Street under rail arch.

Works will be carried out between 8:00pm and 6:00am and whilst we will try and keep the noisy work elements to the earlier part of the shift this cannot always be guaranteed as we need to ensure the surface is planed out ready for surfacing the following nights.

During the works there will be signed diversion routes in place for each road closure dependent upon which road is being worked on at that stage and operatives will be stationed at the road closures to advise residents and any deliveries

Our night shifts for plane out and surfacing will be from Monday night to Friday night inclusive.

Thank you in advance for your co-operation and understanding and if you do have any queries at all then please contact the writer on the number below.

Ensuring you of our best intentions at all times.

A.J.Eldon
