This is based on measured data not modelled estimates. We fundamentally do not accept Ofcom's position on mobile phone signal coverage, and are in the process of challenging this. Resider objections: 5  1 Mobile signals are poor and/or sporadic. One of the local farmers told me yesterday that they are concerned about the lack of landlines once fibre broadband is fully rolled out. The phone box in the village may be the only way people can call emergency services in a crisis if the fibre network goes down. It is imperative that it stays. It is opposite the primary school and a reassurance to residents many of whom are elderly (Greenacres)  2 - I rarely have a mobile signal at home and all too often my broadband drops out. When our land line move over to digital the public phone box in the village will be vital for emergency use. Therefore I object to it bein removed. (The Old Rectory)  4 - We regularly have poor internet signal and the phone box is a constant safe route for dialling emergency 999 services. (Glebe House, same postcode as payphone)  5 - we regularly have poor internet signal and the phone box is a constant safe route for dialling emergency 999 services. (Rose Cottage, same postcode as payphone)  Further comment received from a villager to say that providers are Three and Vodafone but they do not always get good connections in the house and have to rely upon WiFi aided calling within their home. | SC object to removal of the operational telephony at this kiosk due to inadequate mobile phone signal coverage across all four mobile phone company operators. Our independently measured data is at variance with the mobile phone signal data that BT has used in identifying this kiosk for proposed gremoval.  SC also object to removal of this as an operational payphone, due to concerns raised by five different local households about the accuracy of the mobile phone signal coverage stated on the consultation from BT; its extent across all four operators; and the need for this rural community to use the payphone in an emergency. The payphone sees ongoing usage and is located by a primary school and church, |

N/A  N/A  N/A  2021 Proceed with closure on poor usage grounds 2016 Object to see this box retained due to call usage and proximity to elderly residents in the event of an emergency 2016 Object | methods available in an emergency The information provided by BT shows significant call volumes as well as usage for contacting helplines. This shows that local people have a need to contact helplines so the facility should be retained even if it is only used by 1 person for 1 call in a 12 month period. Councillors are aware of instances of domestic abuse and coercive control in the village and the view of the Council is that if the payphone is used by 1 person in need in a year that it's worth retaining the phone.  Llanyblodwel Parish Council have no objection to the removal of the telephone from the phonebox in Nantmawr (No 28) and would be interested in adopting it to house a defibrillator.  Parish Council support the wish of the trustees of the Jones and Wainwright Educational Trust, on whose land the kiosk is situated, to adopt this kiosk for community uses. | Y           | none further received  none further received  SC has verified this with the PC and the Jones and Walnwright Educational Trust.  none received  none received  Removal was previously agreed by TC   | operational telephony at this kiosk due to inadequate mobile phone signal coverage across four mobile phone company operators. Our independently measured data is at variance with mobile phone signal data that BT has used in identifying this kiosk for proposed removal.
